Empowering Local Governments Through Digital Transformation

Content Provision

2. Content Provision

Indicator	Description
<u>1. #212 Foreign language support</u>	Information or services on the MGP in another language besides the official or primary country language
<u>2. #217 Municipality information</u>	Information about the history, geography, collectivities, demography, culture, tourism, economy, and nature of the municipality
<u>3. #218 Alerts for weather and natural disasters</u>	Web push notification mechanism whereby people can receive updates or subscribe to keep updated about emergency situations
<u>4. #220 Procurement announcements</u>	Information on the acquisition of goods, services or works from an external source by a government
<u>5. #221 Procurement results</u>	Information on the results of acquisition of goods, services or works from an external source by a government
<u>6. #222 Information about provided services</u>	A list of services that includes information about each service
<u>7. #223 Services in partnership with 3rd parties</u>	Information on initiatives undertaken in collaboration with 3rd parties
<u>8. #226 Health information</u>	Information related to health matters
<u>9. #227 Environmental information</u>	Information related to environmental matters

2. Content Provision (cont.)

Indicator (cont.)	Description
<u>10. #228 Education information</u>	Information related to educational matters
<u>11. #229 Social welfare information</u>	Information related to social welfare
<u>12. #230 Sports and culture information</u>	Information related to leisure, culture and sports matters
<u>13. #231 Information for vulnerable groups</u>	Information related to vulnerable groups
<u>14. #232 Justice information</u>	Information related to justice matters.
<u>15. #233 Labor information</u>	Information related to labor matters.
<u>16. #238 Evidence of smart cities initiatives</u>	Evidence of smart cities initiatives or efforts.
<u>17. #239 Evidence of emerging technologies use</u>	Evidence of the municipality's use of any emergent technology (e.g., blockchain, artificial intelligence, IoT, etc.)
<u>18. #243 Statistical data and studies</u>	Evidence of quantitative data related to SDGs achievement in the municipality
<u>19. #282 Public transportation information</u>	Material relating to public transportation services or information
<u>20. #283 Evidence of mobile phone apps</u>	Evidence of mobile phone applications fulfilling/complementing a government related duty

Indicator (cont.)	Description
<u>21. #284 Waste and recycling information</u>	Information related to waste reduction, recycling and reuse
<u>22. #285 Road safety information</u>	Information related to road matters
<u>23. #289 MGP usage statistics</u>	Information data relating to user statistics
<u>24. #290 COVID-19 information</u>	Evidence of a specific local government portal or a dedicated section addressing emergencies and disasters.
<u>25. #291 Information about air pollution policies</u>	Information about air pollution-related policies
<u>26. #292 Data related to air pollution</u>	Indicators such as data, real-time data, and statistics related to air pollution?
<u>27. #293 User Satisfaction Mechanism Measure</u>	Mechanism to measure user satisfaction
<u>28. #294 Data on user satisfaction</u>	Data regarding portal user satisfaction
<u>29. #295 Upcoming events in the city</u>	Information about upcoming events in the city
<u>30. #296 News Section about the city</u>	Section on news about the city

1. Foreign language support (#212)

What	Provision of information or services in the MGP in another language besides the official or primary country language.
Why	Ensures inclusivity and accessibility, enabling diverse communities within the municipality to access essential services, information, and resources effectively, fostering a sense of belonging and participation.
How?	Indicative steps: 1. Identify Target Languages - Determine which languages are widely spoken within the community or region served by the municipal government. 2. Content Management System (CMS): - Choose a CMS that supports multilingual content. 3. Regular Updates and Maintenance: - Continuously update translated content to reflect changes in policies, services, or important announcements. For more information check out US GSA Non-English Digital Content Guide: or Weglot's guide
Case Examples 	Check out New York's portal, available in eleven languages. Submit your case here

2. Municipality information (#217)

What	Information about the municipality such as the history, geography, collectivities, demography, culture, tourism, economy and nature of the municipality.
Why	Fosters community engagement, promotes transparency, and enables residents and visitors to have a deeper understanding of the local area's heritage, resources, and opportunities.
How?	Indicative steps: 1. Gather Accurate Data: a. Collect reliable and up-to-date information about the municipality 2. Content Organization: a. Categorize the information into sections such as "History," "Geography," "Demography," etc "Economy," "Regular Updates and Maintenance: 3. Regular Updates: a. Assign responsibility for keeping the information updated.
Case Examples	Check out Ho Chi Minh's About page
	Submit your case here

3. Alerts for emergency situations (#218)

What	Information regarding the existence and use of a web push notification mechanism, whereby people can receive updates or subscribe to notifications to keep updated about emergency situations (weather, natural disaster, air pollution, flooding, earthquake, etc.). The information may be available in a link provided to the external platform used by the municipality.
Why	Ensure the safety and preparedness of residents, providing real-time information that enables them to make informed decisions and take necessary precautions during emergencies.
How?	Indicative steps: Assessment of Emergency Needs: - Identify the types of emergencies common to your region Choose Alert Methods: - Decide on the communication methods, such as text messages, emails, push notifications, or social media, Emergency Alert System (EAS): - Integrate an EAS service or software that enables authorities to send alerts promptly Regular Testing: - Conduct regular tests of the alert system to ensure it functions correctly.
Case Examples 	Check out New York's dedicated app for receiving notification on emergencies

Submit your case [here](#)

4. Procurement announcements (#220)

What	A government procurement is the acquisition of goods, services or works from an external source by a government. Some governments may use the terms "tender" or "contract" instead and may provide a link to the external platform used by the municipality.
Why	Essential for promoting transparency, encouraging fair competition, and ensuring that businesses and contractors have equal access to opportunities, fostering accountability and trust within the community.
How?	Indicative steps: 1. Legal Compliance and Policies: a. Familiarize yourself with local and national laws governing public procurement. 2. Dedicated Webpage/Website Creation: a. Create a dedicated section on the municipal website, or external link for procurement/bidding processes. 3. Document Transparency: a. Provide access to procurement documents such as Requests for Proposals (RFPs), bid specifications, and contracts. 4. Regular Updates: a. Keep the procurement section up-to-date with the latest opportunities, amendments, and results. For more information, check out this guide by the current author for digitalizing your procurement processes.
Case Examples	Check out Abu Dhabi's Government Procurement Gate.

5. Procurement results (#221)

What	A government procurement is the acquisition of goods, services or works from an external source by a government. Some governments may use the terms "tender" or "contract" instead. Results of procurement processes are either indicated on the MGP or on the external platform used by the municipality
Why	Crucial for transparency, ensuring accountability, and fostering public trust by demonstrating fair and responsible use of taxpayer funds.
How?	Indicative steps: 1. Create a Dedicated Section: a. Develop a dedicated webpage for procurement results 2. Organize Content: a. Categorize results by projects, contracts, or departments 3. Document Preparation: a. Compile procurement outcomes, including bid winners, contract details, and project status 4. Regular Updates: a. Update the section promptly after each procurement process For more information, check out this guide by the current author for digitalizing your procurement processes.
Case Examples 	Check out Abu Dhabi's Government Procurement Gate .

6. List of municipality provided services (#222)

What	The list of services includes information about each service (e.g. Name, Description, Process, Documents, Timetable, Cost, etc.).
Why	Crucial for residents, providing clear guidance on services offered, ensuring transparency, and accessibility by empowering people with comprehensive knowledge about processes, requirements, and costs.
How?	Indicative steps: 1. Compile a Comprehensive List: a. Gather information about all the services offered by the municipality. 2. Categorize Services: a. Organize services into categories 3. Service Details: a. For each service, provide detailed information including the name, description, application process, required documents, processing time, costs (if any), and relevant contact information. 4. Regular Updates: a. Keep the service information up-to-date.
Case Examples 	Check out Tallinn's List of Services .

Submit your case [here](#)

7. Services in partnership with 3rd parties (#223)

What	Initiatives undertaken in collaboration with 3rd parties (e.g. Crowdsourcing is the practice of funding a project or venture by raising monetary contributions from a large number of people, typically via the internet)
Why	Vital for fostering transparency, promoting community engagement, and demonstrating the collaborative efforts between the government and local organizations to enhance public welfare and social development.
How?	Indicative steps: 1. Identify Collaborative Services: - Determine which municipal services involve partnerships with civil society organizations. 2. Gather Service Details: - Collect comprehensive information about these collaborative services 3. Create a Dedicated Webpage: - Design a dedicated webpage or section on the municipal website to showcase these services. 4. Regular Updates: - Keep the information up-to-date to reflect the latest developments and partnerships.
Case Examples 	Check out Vancouver's Community Economic Development (CED) Strategy or LOTI - London's local government's innovation team on improving services and tackling London's biggest challenges.

Submit your case [here](#)

8. Health information (#226)

What	Information related to health (e.g. coverage of essential health services, health emergency preparedness)
Why	Ensures informed decision-making and community health awareness by providing residents with essential healthcare resources, guidance on preventive measures, & local health services.
How?	Indicative steps: Content Compilation: - Gather accurate and reliable health information relevant to the community Dedicated Section Creation: - Establish a dedicated section on the municipal website specifically for health information. Clear Categorization: - Organize content into clear categories such as healthcare services, preventive measures, emergency contacts, and mental health support. Regular Updates: - Keep the content current and relevant. Emergency Contacts: - Display important emergency contacts, such as local hospitals, police, and fire departments prominently for immediate assistance.
Case Examples	Check out Buenos Aires' page on Medical care and assistance (In Spanish): or Dubai's dedicated Health portal .

Submit your case [here](#)

9. Environmental information (#227)

What	Information related to environmental matters (e.g. information about how to reduce greenhouse gas emissions).
Why	Crucial for raising awareness, empowering residents with eco-friendly practices, and fostering a collective effort towards environmental sustainability and a greener community.
How?	Indicative steps: Content Compilation: - Gather accurate and up-to-date information on environmental initiatives, practices, tips. Dedicated Section Creation: - Develop a dedicated section on the municipal portal for environmental matters. Clear Categories: - Organize content into clear categories, such as energy conservation, waste reduction, transportation, and green living. Local Relevance: - Include region-specific information, such as local recycling programs, energy-efficient incentives, and eco-friendly businesses to make the content more relatable for residents. Regular Updates: - Keep the content current with the latest environmental initiatives, policies, and technologies.
Case Examples	Check out Luxembourg city's Environment Section and Thimphu Thromde's Environment Page .

10. Education information (#228)

What	Information related to education (e.g., information about early childhood development, care and pre-primary education).
Why	Crucial for raising awareness, empowering residents with knowledge about early childhood development and education, and fostering better educational outcomes and stronger communities.
How?	Indicative steps: Content Compilation: - Gather accurate and up-to-date information about early childhood development, care, and pre-primary education from reliable sources Dedicated Section Creation: - Develop a dedicated section on the municipal portal for education matters. Clear Categories: - Organize content into clear categories. Local School Directories - Include directories of local schools, preschools, and educational institutions. Parental Support - Offer resources for parental support. Regular Updates - Ensure that all information is kept current.
Case Examples 	Check out Montevideo's Education Section (In Spanish).

Submit your case [here](#)

11. Social welfare information (#229)

What	Information related to social welfare matters (e.g., social benefits, information about specific programs/initiatives for specific groups).
Why	Crucial for promoting social equity, assisting vulnerable populations, and ensuring residents have access to essential support programs, fostering an inclusive and caring community.
How?	Indicative steps: 1. Content Compilation: - Gather comprehensive and accurate information about social benefits, welfare programs, and initiatives for specific groups 2. Dedicated Section Creation: - Create a dedicated webpage or section on the municipal portal for social welfare matters. 3. Clear Categories: - Organize content into clear categories, such as social assistance programs, housing support, healthcare services, and programs for specific demographics 4. Local Relevance: - Include information specific to the municipality 5. Regular Updates: - Keep the information up-to-date, including changes in policies, new programs, or application deadlines.
Case Examples 	Check out Reykjavik's Welfare Section

Submit your case [here](#)

12. Sports and culture information (#230)

What	Information related to leisure, culture and sports matters (e.g., Sports, activities & fitness; Parks, playgrounds & open spaces; Events and tourism).
Why	Enhances community well-being, promoting a healthy lifestyle, fostering cultural engagement, and encouraging tourism, creating a vibrant and connected local environment for residents and visitors alike.
How?	Indicative steps: 1. Content Compilation: a. Gather comprehensive information about local sports facilities, cultural events, parks, playgrounds, fitness activities, and tourism attractions within the municipality. 2. Clear Categories: a. Organize content into categories such as sports and fitness activities, cultural events, park information, and tourism attractions. 3. Regular Updates: a. Keep the information up-to-date.
Case Examples	Check out Tallinn's Sports and Culture Section .

Submit your case [here](#)

13. Information for vulnerable groups (#231)

What	Information related to vulnerable groups (women, children, youth, persons with disabilities, older persons, indigenous peoples, people living in poverty etc.)
Why	Crucial for promoting inclusivity, raising awareness about specific needs, and ensuring equitable access to essential services, fostering a more socially just and compassionate community.
How?	Indicative steps: Content Compilation: - Collect comprehensive information about programs, services, and resources specifically designed for vulnerable groups from reliable sources, government agencies, and NGOs. Dedicated Section Creation: - Create a distinct section on the municipal website, clearly labelled and easily accessible from the main menu, dedicated to information related to vulnerable groups. Clear Categories: - Organize content into categories based on vulnerable groups, such as women, children, persons with disabilities, etc., Regular Updates: - Keep the information up-to-date.
Case Examples 	Check out New York's Benefits and Support Section .

Submit your case [here](#)

14. Justice information (#232)

What	Information related to justice matters. Examples: Challenge a ticket, Request for Parking Fine Objection, Appeal municipal taxes, Municipal taxes: contesting assessment, intermediation
Why	Vital for ensuring transparency, people empowerment, and easy access to essential legal information and services, fostering a fair and accountable civic environment.
How?	Indicative steps: Content Compilation: - Gather detailed information about various justice matters such as challenging tickets, parking fine objections, and contesting municipal taxes. Dedicated Section Creation: - Create a specific section on the municipal website labelled "Justice Matters" or a similar title Clear Categories: - Organize information into categories like "Challenging Tickets," "Tax Appeals," "Mediation Services." Legal Resources: - Include links to relevant legal resources, FAQs, and contact information for legal aid organizations or municipal legal departments that can assist people with complex matters. Regular Updates: - Keep the information up-to-date.
Case Examples 	Check out Buenos Aires' Justice and Security Section (in Spanish). Submit your case here

15. Labor information (#233)

What	Information related to labor matters (also termed as employment or work) (e.g., Jobs and training; Skills; Unemployment benefits).
Why	Empowers residents by facilitating access to employment resources, promoting skill enhancement, and ensuring social welfare, thereby fostering a thriving and economically stable local community.
How?	Indicative steps: 1. Define the Section: a. Create a distinct section titled "SDG Achievement Data" or a similar label 2. Categorize SDGs: a. Organize data based on specific SDGs, ensuring clear categorization for easy navigation. 3. Data Sources: a. Clearly mention the sources of the data to ensure transparency and credibility. 4. Data Granularity: a. Provide data at various levels of granularity, from city-wide statistics to specific community or district-level details. 5. Progress Reports: a. Provide regular progress reports or updates to showcase the municipality's advancements toward achieving specific SDGs
Case Examples	Check out London's Employment and Training Section .

Submit your case [here](#)

16. Evidence of smart cities initiatives (#238)

What	A smart city utilizes technology and data-driven solutions to enhance urban living, focusing on improving infrastructure, efficiency, sustainability, and the overall quality of life for its residents. Evidence of Smart city initiatives/ efforts: (i) explicit announcements of smart cities initiatives, projects or services; (ii) the existence of a smart city strategy document or smart city plans; (iii) availability of smart services to people.
Why	Demonstrates the city's commitment to leveraging technology for improved urban living, and informs people about the city's efforts to create an efficient, sustainable, and technologically advanced urban environment.
How?	Indicative steps: 1. Define Smart City: a. Begin by clearly defining what a smart city is on your website. 2. Create a Dedicated Section: a. Establish a separate section on the municipal website specifically labelled as "Smart City Initiatives" or a similar title. 3. Announcements and Projects: a. Regularly update the section with explicit announcements of ongoing and upcoming smart city initiatives, projects, or services. 4. Publish Strategy Documents: a. Make smart city strategy documents, plans, and progress reports available for public access. Check out this EIP-SCC initiative guide: or the ADF's guide.
Case Examples	Check out Jakarta's Smart City Initiative. Submit your case here

What	Evidence of the municipality's use of any emergent technology (e.g., blockchain, artificial intelligence, IoT, etc.). These can be in the form of services and applications that use those technologies (e.g., applications in waste management, parking, transportation, lighting).
Why	Showcases the city's forward-thinking approach but also informs people about the tangible, tech-driven solutions enhancing various aspects of urban life, fostering trust and engagement among residents.
How?	Indicative steps: Assessment and Identification of Needs - Evaluate municipal needs and identify sectors that could benefit from emergent technologies (e.g. waste management, parking, transportation, lighting, or public safety). Stakeholder Engagement - Engage local stakeholders to understand potential applications of emerging technologies. Technology Integration Strategy - Develop an implementation roadmap for integrating emerging technologies into municipal services. Pilot Project - Small-scale pilot projects using technologies such as blockchain, artificial intelligence, IoT, etc. Impact Evaluation and Feedback - Regularly evaluate the impact of implemented technologies and solicit feedback. For more information, check out the Saudi Arabia's guide or IBM's Report or the OECD's AI policy observatory
Case Examples	Check out Seoul's Big Data & AI page or London's Charter on Emerging Technology   Submit your case here

18. Statistical data and studies (#243)

What	Quantitative data related to SDGs achievement in the municipality, in any format (statistical information, tables, graphs, studies, a Voluntary Local Review). Indicative SDGs topics include end poverty, zero hunger, good health and wellbeing, education, gender equality, clean water and sanitation, clean energy, decent work and economic growth, innovation and infrastructure, reduced inequalities, sustainable cities and communities, responsible consumption and production, climate, life below water, life below land, peace justice and strong institutions, partnerships).
Why	Promotes transparency, informs people about the city's progress toward sustainable development goals, and fosters accountability, enabling an engaged and informed community.
How?	Indicative steps: Content Compilation: - Gather comprehensive information about local sports facilities, cultural events, parks, playgrounds, fitness activities, and tourism attractions within the municipality. Clear Categories: - Organize content into categories such as sports and fitness activities, cultural events, park information, and tourism attractions. Regular Updates: - Keep the information up-to-date.
Case Examples 	Check out Paris' page on SDG 12 related to Zero Waste. Submit your case here

19. Public transportation information (#282)

What	Material relating to public transportation services or information (e.g., timetables, route maps, information about fees and payment) or a link of a dedicated public transportation portal.
Why	Enhances accessibility, provides vital information to residents and visitors, and encourages the use of eco-friendly transportation options, promoting a sustainable urban environment.
How?	Indicative steps: Section Creation: - Establish a section on the municipal website dedicated to public transportation services Comprehensive Information: - Include detailed information such as timetables, route maps, fare structures, and payment methods. Clear Categories: Interactive Maps: - Implement interactive maps allowing users to plan routes, check bus/train schedules, and stops. Real-time Updates: - If possible, integrate real-time tracking systems to provide live updates on bus/train locations, arrival times, and delays. Links to External Resources: - If there's a dedicated public transportation portal, provide a direct link to it.
Case Examples	Check out Moscow's Transport Section .

20. Evidence of mobile phone apps (#283)

What	Existence of mobile phone applications fulfilling/complementing a government related duty.
Why	Enhances accessibility, facilitates convenient people engagement, and promotes efficient service delivery, empowering residents with instant access to essential information and services anytime, anywhere.
How?	Indicative steps: 1. App Discovery: - Identify existing mobile phone apps developed for municipal services, including apps for reporting issues, accessing city resources, or paying utility bills. 2. Detailed Descriptions: - Create detailed descriptions for each app, explaining their purpose, features, and benefits. 3. Categorization: - Organize apps into categories based on their functions, such as "Public Services," "Utilities," or "Community Engagement." 4. Links and Downloads: - Provide direct download links for various platforms (iOS, Android) or links to app stores 5. Regular Updates: - Periodically review the listed apps and update the information. Check out the US DGA Guide or IBM's guide.
Case Examples 	Check out Manama's MyCapital App page .

Submit your case [here](#)

21. Waste and recycling information (#284)

What	Information related to waste reduction, recycling and reuse, which can be found under an 'Environment and/or Green Spaces' or 'Living in ...' section. These sections will provide information on how/where people can proceed for the reduction, recycling or reuse of waste
Why	Promotes environmental consciousness, educates residents about proper waste management practices, encourages community participation, fostering a cleaner and more sustainable living environment.
How?	Indicative steps: 1. Create a Dedicated Section: a. Establish a designated section on the municipal website, such as "Waste Management" or "Recycling Guide," 2. Collection Schedules: a. Include regular waste collection schedules for various types of waste. 3. Waste Disposal Locations: a. Provide addresses and operating hours of local waste disposal sites, including landfills, recycling centers, and hazardous waste collection points. 4. Local Initiatives: a. Highlight local initiatives, community clean-up events, or recycling drives.
Case Examples	Check out Bratislava's Waste Section .

Submit your case [here](#)

22. Road safety information (#285)

What	Information related to road matters, e.g., Report a Road Safety Issue, Road Traffic Collision Statistics, Road Improvement Schemes, Road safety advice (for schools and parents), Roadworks, closures and diversions.
Why	Promotes awareness, educates residents about safe driving practices, and plays a significant role in reducing accidents, ensuring the well-being of the community and enhancing overall public safety.
How?	Indicative steps: 1. Create a Dedicated Section: a. Establish a dedicated section on the municipal website, such as "Road Safety Tips" or "Safe Driving Guidelines," 2. Traffic Regulations: a. Provide comprehensive details about local traffic laws, regulations, and speed limits. Include information on fines and penalties for traffic violations. 3. Safe Driving Tips: a. Offer practical tips for safe driving. 4. Pedestrian and Cycling Safety: a. Include guidelines for pedestrians and cyclists 5. Local Road Projects: a. Include updates on ongoing or upcoming road improvement projects.
Case Examples 	Check out Madrid's Road and Safety Section .

Submit your case [here](#)

23. MGP usage statistics (#289)

What	Data relating to user statistics for example new visits, total page views, average time on site etc.
Why	Enables informed decision-making, optimizes user experience, and allows the local government to tailor online services to meet the needs of its residents, enhancing digital engagement and civic participation.
How?	Indicative steps: 1. Choose Analytics Platform: a. Select a reliable web analytics platform like Google Analytics. 2. Define Goals: a. Set up specific goals within the analytics platform. 3. Track Key Metrics: a. Monitor key metrics such as new visits, total page views, bounce rate (percentage of single-page visits), and average time on site. 4. User Surveys and Feedback: a. Integrate surveys or feedback forms on the website to collect direct input from users. 5. Continuous Improvement: a. Use the insights from user statistics to continuously improve the website. For more help, see USA GSA or UK Gov's
Case Examples 	Check out Oslo's Google Analytics Section .

Submit your case [here](#)

What	Evidence of a specific local government portal or a dedicated section addressing emergencies and disasters i.e. flooding, public safety issues, COVID-19 pandemic.
Why	Provides residents with accurate, real-time information during crises such as flooding, public safety issues, or pandemics like COVID-19, ensuring public safety, enhancing preparedness, and community resilience.
How?	Indicative steps: 1. Collaborate and Gather Data: - Work closely with relevant government departments to collect accurate and timely information. 2. Update Portal Infrastructure: - Evaluate the current municipal portal and modify or expand existing sections to accommodate the new emergency data. 3. Real-Time Feeds and Multimedia: - Integrate real-time feeds from relevant agencies to provide up-to-date information. 4. Promotion and Accessibility: - Actively promote the newly integrated section through various channels. Check out FEMA's Guide or British Columbia's
Case Examples	Check out Tokyo's portal on Disaster Prevention. 

Submit your case [here](#)

25. Information about air pollution policies (#291)

What	Evidence of information relating to the city's policy statements or measures on air pollution on the municipal government website.
Why	Essential for promoting transparency, raising public awareness, and encouraging collective efforts toward a cleaner and healthier environment for all residents.
How?	Indicative steps: 1. Policy Compilation: - Gather detailed information about the city's policies and measures on air pollution, including regulations, initiatives, and ongoing projects. 2. Website Section: - Create a dedicated section on the municipal website specifically for air pollution policies, ensuring clear organization and easy access to relevant documents and resources. 3. Content Presentation: - Present the information in a user-friendly manner, using concise language, infographics, and downloadable documents to enhance understanding and engagement. 4. Regular Updates: - Keep the section up-to-date with the latest policies, measures, and progress reports. Regularly update content to reflect the city's ongoing efforts to combat air pollution.
Case Examples 	Check out Paris' page on its actions against air pollution.

26. Data related to air pollution (#292)

What	Evidence of a specific measurement of air pollution, such as metrics, graph, data, etc. on the municipal portal.
Why	Crucial for providing real-time, accurate data to residents, fostering awareness, and empowering informed decision-making to address environmental concerns and improve public health.
How?	Indicative steps: 1. Data Collection: a. Gather precise air pollution metrics and data from reliable sources, including environmental agencies or monitoring stations, ensuring accuracy and real-time updates. 2. Data Visualization: a. Create clear and visually appealing graphs or charts representing the air pollution measurements, making complex data accessible and understandable for residents. 3. Integration: a. Integrate the visualized data into a dedicated section of the municipal portal, ensuring seamless display and compatibility with various devices and browsers. 4. Regular Updates: a. Ensure the data is regularly updated to provide real-time information, reflecting the current air quality status and trends in the city.
Case Examples	Check out Seoul's Air Quality Map .

What	Evidence of any mechanism explaining how user satisfaction is measured, such as using polls or questionnaires on the municipal website.
Why	Essential to gauge user satisfaction, gather valuable feedback, and tailor services effectively, ensuring residents' needs are met and enhancing overall community engagement.
How?	Indicative steps: Selection of Tools: - Choose suitable survey tools or polling platforms that align with the municipality's requirements and are user-friendly for residents to provide feedback. Survey Design: - Develop clear and concise questionnaires/ polls focusing on relevant aspects of municipal services. Website Integration: - Integrate the surveys or polls seamlessly into the municipal website, placing them prominently and ensuring compatibility across various devices and browsers. Promotion: - Actively promote the surveys through social media, newsletters, and official announcements. Data Analysis: - Regularly analyze the collected data to gain insights into user satisfaction levels and use the feedback to improve
Case Examples 	Check out Edinburgh's User Feedback Services

28. Data on user satisfaction (#294)

What	Provision of data showing a percentage or any statistical indicator pertaining to portal user satisfaction on the municipal website.
Why	Crucial for transparency, demonstrating the municipality's commitment to quality services, and building trust with residents, enhancing the overall user experience on the municipal website.
How?	Indicative steps: Data Collection: - Gather user satisfaction data through surveys, polls, or feedback forms, focusing on specific aspects of the municipal website's usability and services. Analysis and Calculation: - Calculate user satisfaction percentages or other statistical indicators based on the collected data. Data Presentation: - Create visually appealing charts or graphs to display the user satisfaction percentages, making the data easy to understand and accessible to website visitors. Integration: - Integrate the graphical representation of user satisfaction data into a dedicated section of the municipal website, ensuring it is prominently displayed and updated regularly. Regular Updates and Transparency: - Keep the user satisfaction data up-to-date and transparent.
Case Examples	Check out Vancouver's Civic Service Satisfaction Survey including online services 

29. Upcoming Events in the city (#295)

What	Evidence of a section about upcoming events in the city on the municipal website
Why	Vital for fostering community engagement, enhancing local participation, and keeping residents informed about cultural, social, and recreational activities in the city.
How?	Indicative steps: 1. Event Compilation: - Gather information about future events from local organizers, businesses, and community groups. 2. Website Design: - Create a dedicated section on the municipal website for upcoming events, organized by date and category. Ensure a user-friendly layout for easy navigation. 3. Regular Updates: - Keep the section current by updating event information promptly, adding new events, and removing past ones to maintain accuracy and relevance. 4. Promotion: - Actively promote the events section through social media, local newsletters, and community outreach, encouraging residents to check the website regularly for upcoming activities. 5. User Engagement: - Foster community engagement by allowing event organizers to submit their events online
Case Examples 	Check out Dublin City's events page

30. News Section about the city (#296)

What	Evidence of a section about news related to municipal policy updates or meaningful stories of citizenry life. This could be a section that gives a list of current affairs in the city that keep residents updated, such as (local/national) new decisions/policy changes, new plans/programmes for city development, and the city activities/agreements aligned with global affairs.
Why	Crucial for enhancing civic engagement, fostering community awareness, and promoting transparency by keeping residents informed about relevant local and global developments shaping their city.
How?	Indicative steps: 1. Content Compilation: - Gather relevant news about municipal policy updates, individual stories, local decisions, policy changes, development plans, and global city activities from credible sources. 2. Website Design: - Create a section on the municipal website for news updates, organized by date and categories. 3. Content Presentation: - Display news articles in a clear, concise, and visually appealing manner. Use multimedia elements. 4. Regular Updates: - Keep the section up-to-date by posting news promptly. Regularly refresh content to reflect the latest municipal developments and individual stories.
Case Examples 	Check out San Francisco's news section .

Implementation of content provision indicators in city portals: sectoral information (percentage of cities)

Source: UN E-Government Survey 2024, UN DESA

These numbers are represented by the 151 cities assessed for the 2024 LOSI

Implementation of content provision indicators in city portals: addressing everyday needs (percentage of cities)

Source: UN E-Government Survey 2024, UN DESA

These numbers are represented by the 151 cities assessed for the 2024 LOSI
