Service Provision

Service Provision

Indicator	Description
<u>1. #029 E-procurement platform</u>	Existence of an e-procurement platform for bidding processes/submission of tenders on the national level portal or other government/ministry websites.
<u>2. #043 Income taxes</u>	Service provision for Personal income taxes at any of the government portal(s)
<u>3. #044 Value Added Tax, Goods & Services Tax</u>	Online provision for businesses for Value Added Tax (VAT), Goods & Services Tax (GST) or equivalent any of the government portal(s)
<u>4. #045 Entry or Transit Visa</u>	Online application for a visa to enter or transit through the country
<u>5. #046 Registration or renewal for a vehicle</u>	Registration or renewal for a vehicle (car, truck, motorcycle, and others) in any of the government portal(s)
<u>6. #047 Online Police declaration</u>	Online declaration to the police (e.g. theft, police report filing) at any of the government portal(s)
<u>7. #048 Address change notification</u>	Notify of moving/changing an address online at any of the government portal(s)
<u>8. #049 Registration for a new company or business entity</u>	Registration for a new company or business entity, with i) information, or ii) full online application at any of the government portal(s).
<u>9. #050, 051, 052 Birth /Death / Marriage certificate</u>	Apply or request for Birth /Death / Marriage certificate with i) information, or ii) full online application at any of the government portal(s).
<u>10. #053 Personal Identity Cards</u>	Apply or request for a Personal Identity Cards with i) information, or ii) full online application at any of the government portal(s).
<u>11. #054 Driver's license</u>	Apply or request for a Driver's license with i) information, or ii) full online application at any of the government portal(s).
<u>12. #055 Land title registration</u>	Apply or request for a Land title registration with i) information, or ii) full online application at any of the government portal(s).
<u>13. #056 Environment-related permits</u>	Apply or request for an Environment-related permit with i) information, or ii) full online application at any of the government portal(s).

Service Provision

Indicator	Description
<u>14. #057 Building permits</u>	Apply or request for a Building permit with i) information, or ii) full online application at any of the government portal(s).
<u>15. #058 Government vacancy positions</u>	Apply or request for a Government vacancy position with i) information, or ii) full online application at any of the government portal(s).
<u>16. #059 Business licenses</u>	Apply or request for a Business license with i) information, or ii) full online application at any of the government portal(s).
<u>17. #062-063 Water utility Energy(electricity/gas) utility</u>	Online payment for utilities (Water/Electricity) offered either by the public or non-public sectors.
<u>18. #079 Digital invoices</u>	National Portal provision of digital invoices or "e-invoicing" at any of the government portal(s)
<u>19. #080,081 GIS data and/or online services</u>	Provision of GIS or other geospatial-related data and/or online services at any of the government portal(s).
<u>20. #082 Business tax filing</u>	Apply or request for Business tax filing with i) information, or ii) full online application at any of the government portal(s).
<u>21. #131b Transitioning people to retirement</u>	Apply or request for transitioning people to retirement with i) information, or ii) full online application at any of the government portal(s)
<u>22. #095, 108, 124, 137, 166, 177 Online services provision for six main sectors</u>	A section on the national website where online services are listed (for HEALTH, EDUCATION, EMPLOYMENT, SOCIAL PROTECTION, ENVIRONMENT, JUSTICE)
<u>23. #095a, 108a, 124a, 137a, 166a, 177a Mobile service provision for six main sectors</u>	Mobile phone i.e. browser or an app services for HEALTH, EDUCATION, EMPLOYMENT, SOCIAL PROTECTION, ENVIRONMENT, JUSTICE

Service Provision

Indicator	Description
<u>24. #095b, 108b, 124b, 137b, 166b, 177b SMS alert service provision for six main sectors</u>	SMS alerts service provision for HEALTH, EDUCATION, EMPLOYMENT, SOCIAL PROTECTION, ENVIRONMENT, JUSTICE
<u>25. #117,118 Scholarships or other forms of government funding and government scholarships and fellowships</u>	Information on available scholarships or other forms of government funding for EDUCATION and government scholarships and fellowships online with i) information, or ii) full online application at any of the government portal(s)
<u>26. #143,144,145,146,147,148 Services/ Information available for vulnerable groups</u>	Service or information for vulnerable groups with i) information, or ii) full online application at any of the government portal(s) Vulnerable groups: poor (below poverty line) /persons with disabilities /older persons / immigrants, migrant workers, refugees, and internally displaced persons / women /youth
<u>27. #149 Application for citizenship or residency</u>	Information on eligibility and/or procedure on applying for citizenship or residency any of the government portal(s)
<u>28. #182 Affidavit of criminal record/background clearance</u>	Application for receiving an affidavit of criminal record/background clearance with i) information, or ii) full online application at any of the government portal(s)
<u>29. #183 Access to justice information</u>	Access to justice with i) retrieve information, ii) file (open) online; iii) manage of court cases
<u>30. #184,185,189,190,191 Benefits Application</u>	Apply or request for benefits due to illness and injury/ child benefits/ disability compensation benefits / maternal or newborn benefits/ unemployment benefits with i) information, or ii) full online application at any of the government portal(s)

1. #029 E-procurement platform (#029)

What	The provision by the government of an e-procurement platform for bidding processes/submission of tenders.
Why	Ensures transparency, enhances competition, and streamlines bidding processes, fostering fair and efficient access for vendors while promoting accountability and reducing corruption in public procurement.
How?	Indicative steps: 1. Planning: - Foster collaboration from across the administration at each stage and validate user needs assumptions. - Involve diverse user groups in the planning phase. 2. Informing the Market: - Articulate clear, value-based requirements and evaluation criteria. - Broadly advertise opportunities and promptly respond to supplier queries. 3. Evaluation and Award: - Objectively shortlist suppliers and conduct evaluations of suppliers with a diverse team. - Award the contract to the supplier aligning best with requirements. 4. Additional Guidance: - Encourage supplier questions for clarity. - Proactively manage conflicts of interest. - Maintain comprehensive records accessible to relevant stakeholders. Check out the full ITU Procurement Guidelines - United for Smart Sustainable Cities (U4SSC)
Case Examples 	Check out Argentina's e-procurement platform

Submit your case [here](#)

What	The ability for residents to file online personal income tax on any of the national government portals.
Why	Enhances efficiency, reduces paperwork, and ensures accurate and timely submissions, thereby simplifying the tax process for businesses and promoting fiscal responsibility within the country.
How?	Indicative steps: Assess Legal and Security Requirements: - Ensure the online system complies with data protection laws and implements robust security. Choose an E-Government Platform: - Select or develop a secure and user-friendly e-government platform handling income tax forms. Collaborate with Tax Authorities: - Work closely with tax authorities to integrate the online system with their databases. Secure Payment Gateway: - Integrate a secure payment gateway for businesses to pay taxes and fees online. Automated Notifications: - Set up automated email notifications to confirm receipt of submitted forms and provide updates. Data Integration and Analysis: - Integrate the online tax filing system with other government databases.
Case Examples 	Check out the United Kingdom of Great Britain and Northern Ireland tax return online form Submit your case here

3. Value Added Tax, Goods & Services Tax (#044)

What	The ability for businesses to submit online for: Value Added Tax (VAT), Goods & Services Tax (GST) or equivalent on any of the national government portals.
Why	Streamlines administrative processes, improves efficiency, and enhances transparency in tax administration for businesses, thereby promoting compliance and supporting the government's revenue collection efforts
How?	Indicative steps: 1. Develop Online Platforms: a. Create user-friendly online platforms specifically for businesses to manage VAT, GST, or equivalent. 2. Enable Registration: a. Allow users to register for VAT/GST online, streamlining the process and reducing paperwork. 3. Facilitate Tax Filing: a. Provide digital tools for users to easily file tax returns electronically, including automated calculations. 4. Allow Online Payments: a. Enable users to make tax payments securely through the online portal using various payment methods. 5. Offer Access to Information: a. Provide comprehensive guidance and resources on VAT/GST regulations, compliance requirements, and deadlines. 6. Ensure Data Security: a. Implement robust security measures to safeguard users' sensitive tax information and financial data. For more information, check out the OECD's International VAT/GST Guidelines
Case Examples 	Check out Thailand's VAT-SBT e-portal

4. Entry or Transit Visa (#045)

What	This online process allows applicants to complete and submit visa forms, upload required documents, pay application fees, and schedule appointments without the need for physical submission.
Why	Streamlines the visa application process, enhances efficiency, and improves accessibility for travelers, reducing processing times and administrative burdens for both applicants and government authorities.
How?	Indicative steps: 1. Develop Online Portal: a. Create a dedicated section on the government portal for visa applications. 2. Enable Online Applications: a. Implement an online form for visa applicants to complete and submit electronically. 3. Provide Document Upload: a. Allow applicants to upload required documents securely through the portal. 4. Offer Online Payment: a. Enable online payment options for visa application fees. 5. Facilitate Appointment Booking: a. Allow applicants to schedule visa appointments online, if necessary. 6. Ensure Data Security: a. Implement robust security measures to protect applicants' personal information. 7. Offer Application Tracking: a. Enable applicants to track the status of their visa applications online.
Case Examples	Check out New Zealand's Visa portal

5. Registration or renewal for a vehicle (#046)

What	Registration or renewal for a vehicle (car, truck, motorcycle, and others) in any of the government portal(s). Users can access and complete registration forms, upload required documents, pay registration fees, and schedule appointments if necessary.
Why	Streamlines administrative procedures, improves efficiency, and enhances accessibility for vehicle owners, thereby contributing to overall customer satisfaction and effective governance.
How?	Indicative steps: 1. Assess Legal and Security Requirements: a. Understand country laws and regulations related to online vehicle registration and renewal. b. Ensure compliance with data protection and cybersecurity standards to safeguard user information. 2. Implement Secure Payment Gateway: a. Integrate a secure payment gateway for processing registration or renewal fees. b. Utilize encryption and other security measures to protect financial transactions. 3. Enable Document Uploads: a. Allow users to upload necessary documents (such as vehicle title, insurance, and identification). 4. Integrate Verification Systems: a. Integrate with relevant databases (e.g., vehicle registration database, insurance records) for real-time verification of user-provided information. 5. Implement Notification System: a. Set up automated email or SMS notifications to inform users about the status of their application.
Case Examples	Check out Monaco's online vehicle registration

Submit your case [here](#)

6. Online Police declaration (#047)

What	The ability for users to make declarations to the police online, (e.g., declaring a theft) on the national porta.
Why	Ensures swift reporting of incidents like theft, promoting national safety and enabling law enforcement to respond effectively.
How?	Indicative steps: 1. User-Friendly Interface: a. Create a simple, intuitive interface on any of the government portal(s) where users can easily locate the online declaration section. 2. Clear Instructions: a. Provide clear instructions guiding users on how to fill out the online declaration form.. 3. Secure Platform: a. Implement robust security measures to protect users' sensitive information. 4. Real-Time Confirmation: a. Send an immediate confirmation to users once their declaration is submitted, 5. Automated Case Numbers: a. Generate automated case numbers for each declaration. 6. Integration with Police Database: a. Integrate the online declaration system with the national police database
Case Examples	Check out Saudi Arabia's Police App .

Submit your case [here](#)

7. Address change notification (#048)

What	The ability to notify the government of moving/changing your address online.
Why	Enhances efficiency, ensures accurate citizen records, and facilitates seamless service delivery, promoting convenience and reducing bureaucratic delays.
How?	Indicative steps: 1. Website Development: a. Mobile Compatibility: Ensure the online service is accessible and user-friendly 2. Secure Online Platform: a. Data Encryption: Implement SSL certificates to encrypt user data for security during transmission. b. User Authentication: Utilize secure user authentication methods to validate users' identities. 3. Address Verification: a. Address Validation: Integrate address validation services to confirm the accuracy. b. Document Upload: Allow users to upload documents (e.g., utility bills) as proof of new address. 4. Notification Process: a. Confirmation Emails: Send confirmation emails to users after successful address change submissions. b. Automated Notifications: Notify users about the status of their application through emails or SMS. 5. Integration with Government Databases: a. Database Integration: Integrate with national databases to update citizen information in real-time.
Case Examples	Check out Saudi Arabia 's page for modifying the national address

Submit your case [here](#)

8. Registration for a new company or business entity (#049)

What	The ability to register for a new company or business entity with i) information, or ii) full online application at any of the government portal(s).
Why	Enhances efficiency, reduces paperwork, and provides convenient access for entrepreneurs, fostering a business-friendly environment within the government.
How?	Indicative steps: 1. Develop Online Registration Form: a. Create a streamlined digital form for new company or business entity registration on the government portal. 2. Provide Clear Instructions: a. Offer concise guidance on the registration process, requirements, and necessary documentation. 3. Enable Document Upload: a. Allow users to upload required business documents electronically through the portal. 4. Implement Secure Authentication: a. Ensure robust authentication measures to verify users' identities and protect sensitive business information. 5. Offer Real-Time Status Updates: a. Enable users to track the progress of their registration application and receive notifications on any required actions.
Case Examples	Check out Kazakhstan's online registration for a business entity

9. Birth /Death / Marriage certificate (#050, 051, 052)

What	The ability to apply for a birth/death/marriage certificate online with i) information, or ii) full online application at any of the government portal(s).
Why	Streamlines the process for users, ensuring timely and accurate documentation, promoting efficiency, and enhancing overall citizen satisfaction.
How?	Indicative steps: 1. Assess Legal Requirements: a. Ensure compliance with country laws and regulations regarding online certificate applications. 2. Implement Security Measures: a. Prioritize data security. Use encryption protocols to safeguard sensitive information. 3. Integrate Payment Gateways: a. If applicable, integrate secure payment gateways to facilitate online payment for processing fees. 4. Establish Verification Protocols: a. Implement a robust system for verifying applicant identities. 5. Enable Document Upload: a. Allow applicants to upload necessary documents digitally. 6. Provide Application Tracking: a. Offer a feature that enables applicants to track the status of their applications.
Case Examples	Check out Finland's online certificate page

Submit your case [here](#)

What	The ability for users to apply or request for a Personal Identity Cards with i) information, or ii) full online application at any of the government portal(s).
Why	Streamlines administrative procedures, enhances accessibility, and improves efficiency in the issuance of personal identification documents,
How?	Indicative steps: Develop Online Form: - Create a simple, user-friendly digital application form for Personal Identity Cards on the government portal. Enable Document Upload: - Allow users to securely upload necessary identification documents directly through the portal. Implement Secure Payment: - Provide a safe and reliable online payment system for any associated fees. Offer Appointment Booking: - Allow users to schedule appointments for in-person verification or card collection if needed. Ensure Data Protection: - Implement stringent security measures to safeguard users' personal information and privacy. For more information, check out the European Commission's page on European Digital Identity
Case Examples	 Check out Japan's online application for an Identity card Submit your case here

11. Driver's license (#054)

What	The ability for users to apply for driver's licenses with i) information, or ii) full online application at any of the government portal(s).
Why	Enhances citizen convenience, reduces administrative burden, and promotes efficient government services, streamlining the application process for residents while ensuring accurate and secure data submission.
How?	Indicative steps: 1. Website Preparation: a. Ensure your government website has a secure and user-friendly interface 2. Data Security: a. Implement robust data encryption and security measures to protect applicants' sensitive information. 3. Application Development: a. Collaborate with a skilled web developer or use a trusted application platform 4. Payment Gateway Integration: a. Integrate a secure payment gateway to facilitate online payments. 5. Document Upload Feature: a. Implement a secure document upload feature allowing applicants to submit necessary documents 6. User Guidance: a. Provide clear instructions and guidelines throughout the application process to assist users.
Case Examples	Check out France's online Driver's license page

12. Online land title registration (#055)

What	The ability to apply for land title registration online with i) information, or ii) full online application at any of the government portal(s).
Why	Enhances accessibility, streamlines bureaucratic processes, and promotes efficiency, ensuring people can securely manage property transactions and reducing paperwork.
How?	Indicative steps: Digital Platform Development: - Design a secure, user-friendly platform for land title registration with Mobile Responsiveness. User Authentication and Security: - Implement strong authentication methods, such as two-factor authentication, to verify users' identities. - Utilize SSL certificates to encrypt data transmitted between users and the online platform. Document Verification and Submission: - Allow applicants to upload necessary documents securely. - Integrate automated tools to verify document authenticity and accuracy. Real-Time Application Tracking: - Provide a unique application ID to track the status of their application. - Send automated email or SMS notifications to update applicants. Integration with Government Databases: - Integrate the online platform with national databases and land registry systems. - Ensure seamless synchronization between online submissions and internal government records.
Case Examples 	Check out Sweden's online registration of a property and mortgage Submit your case here

13. Online environment-related permit (#056)

What	The ability to apply for environment-related permits online with i) information, or ii) full online application at any of the government portal(s).
Why	Streamlines the application process, promotes environmental compliance, and facilitates sustainable development practices within the country.
How?	Indicative steps: 1. Assess Legal Requirements: a. Research and understand the legalities and regulations concerning environment-related permits in your country. Ensure that the online system complies with all necessary laws. 2. List Required Documents: a. Clearly state all the documents and information applicants need to provide. 3. Develop Secure Online Forms: a. Build secure online forms that capture all necessary details. 4. Provide Detailed Instructions: a. Clearly outline the application process, required documents, and fees. 5. Secure Online Payment Gateway: a. Integrate a secure online payment gateway for applicants to pay permit fees. 6. Implement Tracking System: a. Develop a tracking system that allows applicants to check the status of their applications.
Case Examples	Check out Israel's application for import/export of hazardous waste

Submit your case [here](#)

14. Online building permit (#057)

What	The ability to apply for building permits online with i) information, or ii) full online application at any of the government portal(s).
Why	Enhances efficiency and convenience for people and businesses, streamlining the process, reducing paperwork, and ensuring quicker approvals, fostering economic development and adherence to regulations.
How?	Indicative steps: 1. Website Preparation: a. Create a dedicated section for building permits, clearly visible in the website's navigation menu. 2. Online Platform Selection: a. Choose a secure and user-friendly online platform where applicants can submit their forms. It could be a section within your national website or an external portal. 3. Provide Detailed Instructions: a. Clearly outline the application process, required documents, and fees. 4. Secure Online Payment Gateway: a. Integrate a secure online payment gateway for applicants to pay permit fees. 5. Real-Time Application Tracking: a. Implement a system that allows applicants to track their application status in real-time. For more info, check out the current author's full guide.
Case Examples	 Check out Ukraine's online permit for construction work

15. Government vacancy positions (#058)

What	The ability to apply for government vacancy positions online with i) information, or ii) full online application at any of the government portal(s).
Why	Enhances accessibility, streamlines the application process, and promotes equal opportunities, ensuring a more efficient and inclusive recruitment system for all residents.
How?	Indicative steps: Select an Applicant Tracking System (ATS): - Choose a reputable ATS software that aligns with the country's needs Detailed Job Listings: - Provide comprehensive job descriptions, qualifications, and application instructions for each vacancy. Resume Upload and Parsing: - Enable applicants to upload resumes and ensure the system can parse essential information. Customized Application Forms: - Create tailored application forms for different job categories, gathering specific information required. Integration with HR Systems: - Integrate the online application system with existing HR databases for seamless data transfer and efficient application processing. Automated Notifications: - Set up automated email notifications to acknowledge application submissions and provide updates. Check out this guide by ebizneeds: or Workable's
Case Examples	Check out Peru's dedicated government portal for vacancy positions

16. Registration for business license (#059)

What	The ability to apply for a business license online with i) information, or ii) full online application at any of the government portal(s).
Why	Enhances efficiency, reduces paperwork, and provides convenient access for entrepreneurs, fostering a business-friendly environment within the government.
How?	Indicative steps: 1. Assess Requirements: a. Identify essential features: user registration, document uploads, payment gateways. 2. Choose a Platform: a. Opt for a user-friendly CMS like WordPress or specialized licensing software. b. Prioritize security, ease of customization, and scalability 3. Ensure Security: a. Implement robust user authentication methods & Regularly update security protocols 4. Enable Document Uploads: a. Integrate cloud storage 5. Incorporate Payment Gateways: a. Include multiple payment options: credit/debit cards, PayPal, online banking. 6. Implement Application Tracking: a. Assign unique application IDs for tracking.
Case Examples	Check out Iceland's online business registration page

Submit your case [here](#)

17. Water utility/ Energy (electricity/gas) utility (#062-063)

What	The ability to pay for online expenses related to utilities (water and energy), either on public or non-public sectors website.
Why	Enhances user convenience, promotes timely payments, and streamlines administrative processes, ensuring efficient and hassle-free transactions for residents.
How?	Indicative steps: Select a Secure Payment Gateway: - Choose a reliable and secure payment gateway provider that supports online transactions. Integration with Government Website: - Seamlessly integrate the selected payment gateway into the government website. - Implement SSL encryption to protect data during transmission between the user and the gateway. Payment Options and Information: - Clearly display payment options (credit cards, debit cards, digital wallets) and accepted currencies. Provide External Payment Portal Link (if applicable): - If using an external payment portal, clearly indicate the link on the government website. Automated Confirmation and Receipts: - Email electronic receipts to users, including transaction details and a reference number. Data Security Measures: - Store minimal customer data and comply with data protection regulations. Check out Science Soft's guide.
Case Examples	Check out Cabo Verde's online portal for utilities payment

18. Digital invoices (#079)

What	The ability to pay for digital invoices or "e-invoicing" at any of the government portal(s). Users can manage their financial transactions with government agencies, such as paying for services, taxes, fees, or fines, using secure online payment methods.
Why	Enhances transparency, streamlines administrative processes, reduces paperwork, and improves the overall efficiency
How?	Indicative steps: 1. Create E-Invoicing Section: a. Develop a dedicated section on the government portal for e-invoicing transactions. 2. Enable Secure Payment: a. Integrate a secure online payment system for users to settle digital invoices. 3. Provide Invoice Access: a. Allow users to view and download digital invoices directly from their accounts. 4. Offer Multiple Payment Options: a. Provide diverse payment methods, such as credit cards, bank transfers, or digital wallets. 5. Ensure Data Protection: a. Implement robust security measures to safeguard users' financial information and transaction details. For more information, check out the European Commission's digital invoice page
Case Examples	Check out Estonia's digital invoice portal Submit your case here

19. GIS data and/or online services (#080,081)

What	The presence of GIS or other geospatial-related data and/or online services at any of the government portal(s). These can give access to spatial information, maps, and related services for users, allowing users to visualize, analyze, and interpret geographic data for various purposes
Why	Enhances transparency, promotes evidence-based decision-making, improves public service delivery, and fosters innovation and collaboration
How?	Indicative steps: 1. Assess Needs and Requirements: a. Identify the specific geospatial data and services that would benefit users and align with objectives. 2. Develop GIS Integration Plan: a. Create a strategy for integrating GIS technologies and datasets into the government portal, considering data acquisition, storage, and visualization. 3. Implement User-Friendly Interface: a. Design an intuitive and user-friendly interface for accessing and interacting with geospatial data and online mapping services. 4. Ensure Data Quality and Accuracy: a. Verify the accuracy and reliability of geospatial data and ensure compliance with data standards and regulations. For more information, check out the UN-GGIM's INTEGRATED GEOSPATIAL INFORMATION FRAMEWORK Guide
Case Examples	Check out The United Arab Emirates's spatial data platforms for online services 

Submit your case [here](#)

20. Business tax filing (#082)

What	The ability for users to apply or request for Business tax filing with i) information, or ii) full online application at any of the government portal(s).
Why	Enhances efficiency, reduces paperwork, and ensures accurate and timely submissions, thereby simplifying the tax process for businesses and promoting fiscal responsibility within the country.
How?	Indicative steps: 1. Assess Legal and Security Requirements: a. Ensure the online system complies with data protection laws and implements robust security. 2. Choose an E-Government Platform: a. Select or develop a secure and user-friendly e-government platform handling various tax forms. 3. Collaborate with Tax Authorities: a. Work closely with tax authorities to integrate the online system with their databases. 4. Secure Payment Gateway: a. Integrate a secure payment gateway for businesses to pay taxes and fees online. 5. Automated Notifications: a. Set up automated email notifications to confirm receipt of submitted forms and provide updates. 6. Data Integration and Analysis: a. Integrate the online tax filing system with other government databases.
Case Examples	Check out Singapore's business tax app

Submit your case [here](#)

21. Transitioning people to retirement (#131b)

What	The ability for users to apply or request for transitioning people to retirement with i) information, or ii) full online application at any of the government portal(s). Allows individuals nearing retirement age to access information, resources, and assistance related to retirement planning and benefits entitlements, as well as to submit applications or requests for retirement benefits, pension schemes, or other retirement-related services.
Why	Enhances accessibility, streamline administrative processes, and improve the overall retirement experience for individuals
How?	Indicative steps: 1. Develop Retirement Transition Section: a. Create a dedicated section on the government portal for retirement transition services. 2. Provide Retirement Information: a. Offer comprehensive information on retirement planning, benefits, and entitlements. 3. Enable Online Applications: a. Implement a user-friendly online application process for retirement benefits or services. 4. Ensure Data Security: a. Implement robust security measures to protect users' personal information and sensitive data. 5. Offer Support Channels: a. Provide online assistance and support for individuals navigating the retirement transition process.
Case Examples	Check out Israel's retirement service page

22. Online services provision for six main sectors (#095, 108, 124, 137, 166, 177)

What	Evidence of a section on the national website where online services are listed for HEALTH, EDUCATION, EMPLOYMENT, SOCIAL PROTECTION, ENVIRONMENT, JUSTICE
Why	Enhance accessibility, transparency, and efficiency in accessing critical government services, promoting citizen engagement and empowerment.
How?	Indicative steps: 1. Establish Sector-Specific Sections: a. Create dedicated sections or links to relevant ministries, on the government portal for each sector, such as health, education, employment, etc. 2. List Available Online Services: a. Compile a comprehensive list of online services offered within each sector, including descriptions and relevant links. 3. Provide Search Functionality: a. Implement a search feature to allow users to easily find specific online services within each sector. 4. Regular Updates: a. Maintain the portal with up-to-date information on available services and ensure links are functional and accurate.
Case Examples	Check out Estonia's online health services page

23. Mobile services for six main sectors (#095a, 108a, 124a, 137a, 166a, 177a)

What	Evidence of users' ability to find mobile phone (i.e. browser or an app) services for HEALTH, EDUCATION, EMPLOYMENT, SOCIAL PROTECTION, ENVIRONMENT, JUSTICE
Why	Ensures convenient and accessible access to government services, meeting the diverse needs of residents, and promoting digital inclusion and engagement.
How?	Indicative steps: 1. Develop Mobile-Friendly Interface: a. Design the government portal to be responsive and compatible with mobile browsers, ensuring seamless access to services on smartphones and tablets. 2. Create Mobile Apps: a. Develop dedicated mobile applications for each sector to provide users with convenient access to services through their smartphones. 3. Offer Download Options: a. Provide clear instructions and download links for users to easily access and install the mobile apps. 4. Ensure Security and Privacy: a. Implement robust security measures to protect users' personal information and ensure data privacy when accessing services through mobile devices. 5. Promote Awareness: a. Advertise the availability of mobile services through various communication channels. Check out the US DGA Guide or IBM's guide.
Case Examples	Check out Canada's mobile application page

24. SMS alert for six main sectors (#095b, 108b, 124b, 137b, 166b, 177b)

What	Evidence of users' ability to receive SMS alerts for services in HEALTH, EDUCATION, EMPLOYMENT, SOCIAL PROTECTION, ENVIRONMENT, JUSTICE
Why	Crucial for ensuring timely notifications, improving accessibility, and enhancing citizen engagement with government services, especially for those with limited internet access or digital literacy
How?	Indicative steps: 1. Implement SMS Notification System: a. Develop a system that allows users to opt-in to receive SMS alerts for government services in the specified sectors. 2. Integrate with Service Offerings: a. Ensure that the SMS notification system is seamlessly integrated with existing online services in health, education, employment, social protection, environment, and justice sectors. 3. Provide Clear Instructions: a. Offer straightforward instructions on how users can subscribe to SMS alerts for specific services. 4. Ensure Privacy and Security: a. Implement robust data protection measures to safeguard users' personal information and ensure compliance with privacy regulations. 5. Monitor and Improve: a. Continuously monitor the effectiveness of the SMS notification system and gather user feedback.
Case Examples	Check out Brunei Darussalam's SMS Exam Results page

25. Scholarships, fellowships or other forms of government funding (#117,118)

What	(#117) Information on available scholarships or other forms of government funding for EDUCATION and (#118) online application for government scholarships and fellowships with i) information, or ii) full online application at any of the government portal(s)
Why	Crucial for promoting accessibility, transparency, and equity in education opportunities.
How?	Indicative steps: 1. Centralize Scholarship Information: a. Compile comprehensive details about available scholarships and government funding programs for education on the government portal. 2. Develop Online Application System: a. Create an online platform for users to easily access information about scholarships and submit applications electronically. 3. Provide Clear Instructions: a. Offer clear guidelines and instructions for users on how to apply for scholarships and government funding through the portal. 4. Ensure Data Security: a. Implement robust security measures to protect users' personal information and sensitive data. 5. Offer Support Channels: a. Provide online assistance and support to help users navigate the scholarship application process.
Case Examples 	Check out South Africa's education funding assistance page

26. Specific Services/ Information available for vulnerable groups (#143,144,145,146,147,148)

What	Service or information for below vulnerable groups with i) information, or ii) full online application at any of the government portal(s). Vulnerable groups: poor (below the poverty line) /persons with disabilities /older persons/immigrants, migrant workers, refugees, and internally displaced persons/women/youth
Why	Ensures equitable access to government support and resources, fostering inclusivity and addressing the specific needs of marginalized populations.
