E-Participation

Indicator	Description
1. #021 Corruption Reporting	Report corruption by public servants or institutions
2. #033 Calendar on e-participation activities	Calendar or announcements about any upcoming public engagement or e-participation activities
3. #034 Online tools for policy	Online tools to obtain raw (non-deliberative) inputs for policy deliberation
4. #037 Open government data portal	Open government data portal
5. #040 New open datasets requests	Possibility to propose/request new open datasets be made available online
6. #042 Open Government Data events	Information about the organization of competitions/ hackathons/ events around the use of open government data
7. 078 Open Datasets on government expenditures	Open Government dataset(s) on national government expenditures (budget
8. # 092, 105,121,134,163, 174 Government expenditures for 6 sectors	Information on government expenditures (budget) on HEALTH/ EDUCATION/ EMPLOYMENT/ SOCIAL PROTECTION/ ENVIRONMENT/ JUSTICE
9. # 096, 109,125,138,167,178 Online consultations for 6 sectors	Information about upcoming consultations intended to involve people in the past 12 months (HEALTH/ EDUCATION/ EMPLOYMENT/ SOCIAL PROTECTION/ ENVIRONMENT/ JUSTICE)
10. #098, 111,127,140,169,180 Inclusion of voices in decision making in 6 sectors	Information about having held online consultations via forums, polls, questionnaires etc. intended to involve people in the past 12 months (HEALTH/ EDUCATION/ EMPLOYMENT/ SOCIAL PROTECTION/ ENVIRONMENT/ JUSTICE)
11. #099, 112,128,141,170,181 Open government datasets for 6 sectors	Open Government dataset(s) on HEALTH/ EDUCATION/ EMPLOYMENT/ SOCIAL PROTECTION/ENVIRONMENT/ JUSTICE

Indicator	Description
12. #131 Labor laws violation report	Report online a violation of labor laws
13. #193 Participatory budgeting	Availability of feature for participatory budgeting or similar mechanism
14. #302 E-participation portal(s)	E-participation portal(s)
15. #303 Open data license	Open data license for open government datasets
16. #304,305,306,307,308,309 Budget expenditure datasets for 6 sectors	Open Government dataset(s) on budget/expenditure in EDUCATION/ EMPLOYMENT/ ENVIRONMENT/ HEALTH/ JUSTICE /SOCIAL PROTECTION
17. #310 Real time open datasets	Evidence of real time open government dataset(s)
18. #313 Online services for rural areas	Evidence of online government service available to the people living in rural area
19. #323 E-petition	Evidence of e-petition or similar mechanism
20. #324,325,326,327,328, 329 Policy-decision making for vulnerable groups	Evidence that people's voices were included in the policy decision-making on issues related to vulnerable group in the past 12 months (for immigrants, older people, persons living below poverty line, persons with disabilities, women, youth).
21. # 330,331,332,333,334,335 Online consultations for vulnerable groups	Information on online consultations via forums, polls, questionnaires etc. to involve people among vulnerable groups in the past 12 months (for immigrants, older people, persons living below poverty line, persons with disabilities, women, youth).

1. Corruption Reporting (#021)

What	The ability for users to report corruption by public servants or institutions on the national government portal. Either via a dedicated platform or mechanism for individuals to confidentially submit allegations or instances of corruption they have encountered
Why	Empowers people to hold government officials and institutions accountable, fosters transparency and integrity in governance, and contributes to the overall efforts to combat corruption within the public sector.
How?	Indicative steps: 1. Develop a Reporting Mechanism: a. Create a dedicated online form or portal section specifically for reporting instances of corruption by public servants or institutions. 2. Ensure Anonymity and Confidentiality: a. Implement measures to protect the identity of individuals making reports. 3. Provide Clear Instructions: a. Offer guidance on how to complete the reporting form, including details on the types of corruption that can be reported, relevant evidence or documentation to include, and the submission process. 4. Establish Investigation Procedures: a. Define protocols for handling and investigating corruption reports. 5. Communicate Follow-up Actions: a. Keep users informed about the progress of their reports, provide updates on any investigations or disciplinary actions taken against implicated parties. For more information, check out the OECD's Public Integrity Handbook
Case Examples	Check out Bolivia's online corruption reporting service

Submit your case [here](#)

2. Calendar on e-participation activities (#033)

What	The provision of information about any upcoming e-participation activities. E-participation initiatives are initiatives offered to engage people in discussions, decision-making and policy-making. These can be identified through announcement(s), a calendar, of upcoming online consultation, voting forums, surveys, polls, etc.
Why	Keeps people informed and engaged in decision-making, fostering transparency, inclusivity, and active civic involvement in shaping national policies and initiatives.
How?	Indicative steps: 1. Centralized Platform: a. Create a dedicated section on the national website for e-participation or a separate portal. 2. Clear Announcements: a. Provide clear and concise announcements about upcoming e-participation activities. 3. Interactive Calendar: a. Maintain an interactive calendar displaying all scheduled e-participation events. 4. Various Participation Tools: a. State what tools can be used for e-participation, online forums, voting platforms, surveys, or polls. 5. Regular Updates: a. Keep the e-participation section or website updated. 6. Promotion and Outreach: a. Actively promote upcoming e-participation events. Check out OECD's guide or the UNIDO
Case Examples 	Check out New Zealand's calendar for online consultations

3. Online tools for policy (#034)

What	The provision of online tools available on the any government portal(s) to collect public opinion from people to inform policy deliberation processes. Possible tools include online fora, social media, online polls, online voting tools, online petition tools, chats, blogs.
Why	These tools facilitate active participation, ensuring diverse perspectives inform policy deliberations, fostering democratic governance and inclusive decision-making processes.
How?	Indicative steps: 1. Select Online Forums: a. Host dedicated forums where people can discuss specific topics. 2. Social Media Platforms: a. Utilize social media channels to conduct polls and surveys. 3. Online Polls: a. Simple and quick, online polls on the government website can gauge public sentiment on various issues. 4. Online Voting Tools: a. Implement secure online voting systems for non-binding national decisions. 5. Online Petition Tools: a. Allow people to create and sign petitions online. Check out UN DESA' paper on E-participation or the OECD's
Case Examples	Check out Slovenia's proposals for regulations page  Submit your case here

4. Open government data portal (#037)

What	The provision of an open government data portal, on a national level portal or at any other government/ministry websites including Statistics offices. Open Data Portal means a sub-website within the Government Website, where Government datasets are made available to the public in machine readable format.
Why	Crucial for promoting transparency, empowering individuals, and fostering innovation by providing easy access to valuable government datasets in a machine-readable format.
How?	Indicative steps: 1. Establish a Dedicated Portal: a. Create a separate section within the national government portal specifically or a dedicated government portal for hosting open government data. 2. Identify Relevant Datasets: a. Determine which government datasets are suitable for publication on the open data portal. 3. Ensure Data Accessibility: a. Publish datasets in machine-readable formats such as CSV, JSON, or XML to enable easy access. 4. Provide Metadata and Documentation: a. Accompany each dataset with comprehensive metadata and documentation, including descriptions, data dictionaries, and usage guidelines to enhance understanding and usability. 5. Implement Regular Updates: a. Commit to regularly updating and expanding the open data portal with new datasets and revisions. Check out UNDP's Open Government Data Policies and Practices with select country cases guide
Case Examples	Check out Estonia's open data portal

5. New open datasets requests (#040)

What	The ability for users to request new open datasets be made available online either on the data portal or elsewhere in government websites.
Why	Essential for fostering collaboration between the government and individuals, promoting transparency, and ensuring that available data aligns with the needs and interests of the public.
How?	Indicative steps: 1. Establish a Request Submission Mechanism: a. Implement a dedicated online form or portal section where users can submit requests for open datasets. 2. Define Submission Guidelines: a. Provide clear instructions on how users should submit their dataset requests. 3. Streamline Review and Approval Process: a. Develop a standardized procedure for reviewing and approving dataset requests, involving relevant government departments or agencies to assess feasibility and relevance. 4. Communicate Progress and Outcomes: a. Keep users informed about the status of their dataset requests, including updates on the review process, approvals, and timelines for dataset publication. 5. Act on User Feedback: a. Consider user feedback and requests as valuable input for prioritizing dataset releases and improving the overall openness and accessibility of government data. Check out UNDP's Open Government Data Policies and Practices with select country cases guide
Case Examples	Check out Israel's page for new open datasets requests

6. Open Government Data events (#042)

What	Information about the organization of competitions/hackathons/events around the use of open government data. This includes those that may not be organized, but are promoted/encouraged, etc. by the government, e.g. technology parks.
Why	Crucial for fostering innovation, collaboration, and engagement within the country, while promoting transparency and leveraging technology for social and economic development.
How?	Indicative steps: 1. Create a Dedicated Section: a. Establish a specific section within the national government portal to showcase information about competitions, hackathons, and events related to open government data. 2. Promote Collaboration: a. Collaborate with relevant stakeholders such as technology parks, universities, and innovation hubs to organize or promote these events. 3. Provide Event Details: a. Include comprehensive details about upcoming competitions, hackathons, and events, including dates, themes, objectives, and registration information. 4. Facilitate Participation: a. Offer easy access to resources, tools, and datasets relevant to the events to encourage participation and innovation. Check out UNDP's Open Government Data Policies and Practices with select country cases guide
Case Examples	Check out Singapore's opportunities around open government data

7. Open Datasets on government expenditures (#078)

What	Provision of open datasets related to national expenditures (budget) in PDF or Word (machine non-readable), or in open format (machine-readable) at any of the government portal(s).
Why	Crucial for transparency, enabling residents to access vital financial data and policy documents easily, fostering accountability, and promoting an informed and engaged community.
How?	Indicative steps: 1. Select Centralize Information: a. Create a dedicated section on the national website to house budgetary information and policy docs. b. Organize the content into clear categories such as annual budgets, financial reports, policy documents. 2. Regularly Update Content: a. Keep the online repository up-to-date with the latest budgetary allocations, financial reports, and policy changes. 3. Interactive Data Visualization: a. Utilize interactive charts, graphs, and infographics to visually represent budgetary data. 4. Feedback Mechanism: a. Integrate a feedback system where residents can ask questions or request additional information. 5. Promote Transparency: a. Clearly outline the country's financial priorities, expenditure breakdowns, and policy. b. Include narratives and visualizations to explain how taxpayer funds are allocated and utilized.
Case Examples	Check out Chile's open data on government expenditures

Submit your case [here](#)

8. Government expenditures for 6 sectors (# 92, 105, 121, 134, 163, 174)

What	information on government expenditures (budget) on HEALTH/ EDUCATION/ EMPLOYMENT/ SOCIAL PROTECTION/ ENVIRONMENT/ JUSTICE. If the Ministry does not offer this, can be shown on general government expenditures.
Why	Crucial for transparency, enabling residents to access vital financial data and policy documents easily, fostering accountability, and promoting an informed and engaged community.
How?	Indicative steps: 1. Establish Dedicated Budget Sections: a. Create separate sections within the government portal for each sector (health, education, employment, social protection, environment, justice) to provide detailed information on government expenditures. 2. Ensure Transparency: a. Publish comprehensive breakdowns of government expenditures, including allocations, spending categories, and beneficiaries, to promote transparency and accountability. 3. Offer User-Friendly Navigation: a. Design the portal interface for easy navigation, allowing users to access expenditure data quickly. 4. Provide Contextual Information: a. Accompany expenditure data with contextual information such as budgetary priorities, funding sources, and performance metrics to enhance understanding. 5. Regular Updates: a. Commit to regularly updating expenditure information
Case Examples	Check out The United States budget expenditures page for their Environmental Protection Agency

9. Online consultations for 6 sectors (#096, 109,125,138,167,178)

What	Information based on announcements have been issued about upcoming consultations intended to involve people in the past 12 months (HEALTH/ EDUCATION/ EMPLOYMENT/ SOCIAL PROTECTION/ ENVIRONMENT/ JUSTICE)
Why	Crucial for promoting civic engagement, transparency, and participation in decision-making processes related to critical sectors such as health, education, employment, social protection, environment, and justice.
How?	Indicative steps: 1. Establish a Consultation Calendar: a. Create a dedicated section on the government portal to display an interactive calendar highlighting upcoming consultations in various sectors. 2. Provide Detailed Information: a. Include comprehensive details about each consultation, such as purpose, topics to be discussed, date, time, location, and how individuals can participate. 3. Enable Online Participation: a. Offer online registration and participation options for consultations 4. Promote Engagement: a. Utilize various communication channels, including social media, email newsletters, and press releases, to actively promote upcoming consultations and encourage citizen participation. 5. Collect Feedback: a. Provide mechanisms for collecting feedback and input from participants during and after consultations.
Case Examples 	Check out the United Kingdom of Great Britain and Northern Ireland's online consultation hub for education

10. Inclusion of voices in decision making in 6 sectors (#098, 111,127,140,169,180)

What	Information about having held online consultations via forums, polls, questionnaires etc. intended to involve people in the past 12 months (HEALTH/ EDUCATION/ EMPLOYMENT/ SOCIAL PROTECTION/ ENVIRONMENT/ JUSTICE). Looks to determine if the input of the people was actually used for policy decision making.
Why	Crucial for fostering transparency and accountability, allowing people to assess if their input contributed to policy decision-making processes in key areas: health, education, employment, social protection, environment, and justice.
How?	Indicative steps: Create a Dedicated Section: - Develop a dedicated section on the government portal to showcase information about past online consultations, organized by sector. Provide Detailed Reports: - Offer detailed reports summarizing the outcomes of each online consultation, including key findings, participant feedback, and how the input influenced policy decisions. Foster Accountability: - Demonstrate the government's commitment to accountability by openly sharing how citizen input from online consultations has been utilized in policy-making processes. Encourage Engagement: - Encourage ongoing citizen engagement by actively promoting the availability of consultation reports and encouraging feedback on the outcomes.
Case Examples	Check out Iceland's consultation portal with information on completed consultation results

11. Open government datasets for 6 sectors (#099, 112,128,141,170,181)

What	Provision of Open Government dataset(s) on HEALTH/ EDUCATION/ EMPLOYMENT/ SOCIAL PROTECTION/ENVIRONMENT/ JUSTICE in either i) Not machine-readable (PDF, scanned files etc.) or ii) Machine-readable (CSV, JSON, XML etc.)
Why	Essential for promoting transparency and enabling data-driven decision-making by providing access to information in both machine-readable and non-machine-readable formats.
How?	Indicative steps: 1. Identify Relevant Datasets: a. Determine which datasets related to health, education, employment, social protection, environment, and justice are crucial for public access and decision-making. 2. Convert to Machine-Readable Formats: a. Convert non-machine-readable datasets, such as PDFs or scanned files, into machine-readable formats like CSV, JSON, or XML for enhanced accessibility and usability. 3. Develop Data Repository: a. Establish a centralized data repository within the government portal to host and manage the open government datasets. 4. Ensure Data Integrity: a. Implement measures to ensure the accuracy, completeness, and security of the datasets. 5. Promote Accessibility: a. Facilitate easy access to the datasets by organizing them logically, and offering clear instructions.
Case Examples	Check out Kazakhstan's open government datasets filterable per section

12. Labor laws violation report (#131)

What	Governments are encouraged to maintain a safe, secure, and inclusive work environment for all groups, including migrants, women, youth, and people of disabilities. Evidence on a government website emphasizing decent work and inclusive work environment, and of gathering information, complaint process, and investigation procedures
Why	Ensures transparency and accountability in promoting decent work conditions and addressing grievances effectively for all demographics, including migrants, women, youth, and people with disabilities.
How?	Indicative steps: 1. Establish a Dedicated Section: a. Create a distinct section on the government portal specifically addressing workplace safety and inclusivity. 2. Provide Legal and Procedural Information: a. Offer detailed information on relevant laws, policies, and procedures governing workplace grievances and inclusivity measures. 3. Offer Training and Awareness Resources: a. Include resources like training and awareness campaigns to promote diversity, inclusion in the workplace. 4. Implement Feedback Mechanisms: a. Set up feedback mechanism allowing users to submit complaints or provide feedback on workplace issues. 5. Regular Updates and Reporting: a. Ensure regular updates on the portal with statistics, reports, and initiatives highlighting efforts toward maintaining a safe and inclusive work environment. For more info, check out ILO's International Labour Standards on Employment security
Case Examples	Check out the United States ' portal for labor laws reporting

13. Participatory budgeting (#193)

What	The provision of participation possibility to the user regarding participatory budgeting or similar mechanism. Many countries around the world are starting to engage the people in the discussion of the country's budget, known as "participatory budgeting".
Why	Empowers people to engage in crucial discussions about the country's financial allocations, fostering transparency, democratic decision-making, and people-driven development.
How?	Indicative steps: 1. User-Friendly Interface: a. Design an intuitive online platform where people can easily access budget-related documents. 2. Transparency: a. Display the current budget, financial reports, and any proposed projects or initiatives. 3. Engagement through Social Media: a. Integrate social media platforms to create awareness about participatory budgeting events. 4. Online Surveys and Feedback Forms: a. Use online surveys and feedback forms to gather opinions and suggestions from people. 5. Clear Timelines: a. Publish clear timelines for the participatory budgeting process. 6. Regular Updates: a. Keep the website updated with progress reports, outcomes of participatory budgeting initiatives.. Check out People Powered's guide or Democratic Society's
Case Examples 	Check out Mauritius Pre Budget Consultation mechanism Submit your case here

14. E-participation portal(s) (#302)

What	The provision of a dedicated e-participation portal available on any government website. This portal serves as a centralized hub where individuals can access information about ongoing consultations, provide feedback on policies and initiatives, participate in surveys or polls, and submit suggestions or ideas directly to government officials.
Why	Promotes transparency, accountability, and democratic governance by direct citizen involvement in public affairs.
How?	Indicative steps: Establishment of a dedicated portal: - Create a separate section within the government website specifically designated for e-participation. Interactive features: - Integrate interactive features such as discussion forums, polls, surveys, and suggestion boxes to encourage citizen engagement. Accessible information: - Ensure that the portal provides clear and comprehensive information about ongoing consultations, policies, and initiatives open for public input. Notification system: - Implement a system to alert users about new consultations, updates, and opportunities for engagement. Feedback mechanisms: - Develop mechanisms for people to provide feedback, suggestions, and comments on proposed policies and initiatives directly through the portal. For more info, check UN DESA's 2020 UN E-Government Survey, Chapter 5 on e-participation
Case Examples	Check out Spain's dedicated e-participation portal

15. Open data license (#303)

What	Evidence of information related to open data license on a national portal. A legal framework or agreement that governs the terms and conditions under which data can be accessed, used, and distributed. It outlines the rights and responsibilities of both data providers and users regarding the sharing and reuse of data.
Why	Crucial in promoting transparency, accountability, and innovation by facilitating the free flow of data while ensuring legal clarity and protection for all parties involved.
How?	Indicative Steps: Select Appropriate License: - Choose a widely recognized open data license e.g. Creative Commons licenses or Open Data Commons. Clearly Display License: - Clearly display the chosen open data license alongside the datasets to inform users of their rights and obligations. Provide License Details: - Include detailed information about the terms and conditions of the open data license, such as permitted uses, attribution requirements, and any restrictions. Offer License Options: - Offer users the flexibility to select from different open data licenses based on their preferences and uses. Ensure Compliance: - Regularly review and update datasets to ensure they comply with the chosen open data license. Check out UNDP's Open Government Data Policies and Practices with select country cases guide
Case Examples	Check out Estonia's open data license page 

16. Budget expenditure datasets for 6 sectors (#304,305,306,307,308,309)

What	Evidence of Open Government dataset(s) on budget/expenditure in EDUCATION/ EMPLOYMENT/ ENVIRONMENT/ HEALTH/ JUSTICE /SOCIAL PROTECTION, either i) Not machine-readable (PDF, scanned files etc.) or ii) Machine-readable (CSV, JSON, XML etc.)
Why	Vital in fostering transparency, accountability, & informed decision-making with the national governance framework.
How?	Indicative Steps: Identify relevant datasets: - Determine the specific budget and expenditure data relevant to each sector. Ensure accessibility: - Make sure the datasets are accessible to the public via the government portal. Choose appropriate formats: - Provide the data in both machine-readable and non-machine-readable formats to cater to different user needs. Regular updates: - Ensure that the datasets are regularly updated to maintain accuracy and relevance.
Case Examples	Check out Finland's budget datasets for education, culture and science

Submit your case [here](#)

17. Real time open government datasets (#310)

What	Evidence of real time open government dataset(s) in i) non-machine-readable (PDF, scanned files etc.) or ii) machine-readable (CSV, JSON, XML etc.). These datasets offer users timely insights into various aspects of government operations, policies, and services.
Why	Enables transparency, accountability, and informed decision-making by allowing stakeholders to access and analyze relevant data in formats suitable for their needs.
How?	Indicative Steps: Establish Data Governance Framework: - Develop policies and procedures for managing real-time open government datasets. Implement Data Integration Tools: - Utilize software tools and platforms to aggregate and integrate real-time data from various government sources into a centralized repository. Ensure Data Accessibility: - Design user-friendly interfaces and access points on government portals to enable easy retrieval and exploration of real-time datasets by the public. Provide Data Documentation: - Publish metadata and documentation alongside datasets to enhance understanding of data. Promote Data Transparency: - Regularly update and maintain real-time datasets to ensure accuracy, reliability, and relevance.
Case Examples	Check out Estonia's real time open government datasets

Submit your case [here](#)

18. Online services for rural areas (#313)

What	Evidence of online government service available to the people living in rural area with i) information, or ii) full online application at any of the government portal(s). Involves ensuring that people in rural communities have access to essential government services through digital platforms such as applying for permits, licenses, or benefits, accessing healthcare information, or participating in government programs
Why	Ensures equitable access to government services for rural residents, promoting inclusivity and bridging the urban-rural digital divide.
How?	Indicative Steps: 1. Identify Services: - Determine essential government services needed by rural residents. 2. Develop Processes: - Create user-friendly online application processes for identified services. 3. Provide Information: - Ensure availability of information tailored to rural areas on government services. 4. Test Accessibility: - Verify functionality and accessibility of online services in rural settings. 5. Promote Awareness: - Conduct targeted outreach campaigns in rural communities to raise awareness of online services. For more info, check out OECD's Guide on Implementing the Rural Well-being Policy Framework
Case Examples	Check out Japan's <i>Join</i> portal linking rural areas with city services

19. E-petition (#323)

What	Evidence of e-petition or similar mechanism providing users with the opportunity to submit petitions, grievances, or requests for action electronically. These platforms allow people to voice their concerns, propose changes, or advocate for specific policies or initiatives directly to the government.
Why	Promotes citizen engagement, transparency, and accountability by facilitating direct communication between the government and its constituents in a digital environment.
How?	Indicative Steps: 1. Designing User-Friendly Interface: a. Create an accessible and intuitive platform for submitting petitions. 2. Implementing Verification Measures: a. Establish robust procedures to verify the authenticity of petitions and petitioners. 3. Setting Clear Guidelines: a. Define eligibility criteria and formatting standards for submitting petitions. 4. Promoting Transparency: a. Ensure public visibility of submitted petitions to encourage community engagement. 5. Structuring Review Process: a. Develop a structured process for reviewing and responding to petitions, including acknowledgment and feedback timelines. Check out UN DESA' paper on E-participation or the OECD's
Case Examples	Check out Germany's dedicated e-petition portal

20. Policy-decision making for vulnerable groups (#324.325.326.327.328.329)

What	Evidence that people's voices were included, i.e. if their input was actually used in the policy decision-making on issues related to the following vulnerable groups (in the past 12 months), for immigrants, older people, persons living below poverty line, persons with disabilities, women, youth.
Why	Vital for transparency and accountability, ensuring that government actions reflect the needs and perspectives of immigrants, older people, individuals living below the poverty line, persons with disabilities, women, and youth.
How?	Indicative Steps: 1. Establish Dedicated Online Platforms: a. Create specific sections or portals on the government website for each vulnerable group. 2. Ensure Transparency: a. Publish summaries of consultations and highlight how input from vulnerable groups influenced policy decisions. 3. Provide Accessible Channels: a. Offer various channels for submitting feedback, including online surveys, forums, and email. 4. Regular Progress Updates: a. Update the portal regularly with progress reports on policy changes driven by public feedback from vulnerable groups. For more info, check out the OECD's Lithuania guide Delivering for people in vulnerable situations.
Case Examples	Check out Denmark's hearing portals filterable by issue

21. Online consultations for vulnerable groups (#330,331,332,333,334,335)

What	Information on online consultations via forums, polls, questionnaires etc. to involve people among vulnerable groups in the past 12 months (for immigrants, older people, persons living below poverty line, persons with disabilities, women, youth), i.e. if actual consultations were held.
Why	Ensures transparency and accountability, indicating whether meaningful engagement occurred in policy discussions affecting these communities.
How?	Indicative Steps: 1. Establish Dedicated Consultation Section: a. Create a dedicated section on the portal specifically for online consultations targeting vulnerable groups. 2. Promote Accessibility: a. Ensure that the consultation platform is accessible to all vulnerable groups, e.g. those with disabilities, providing options for various languages, easy navigation, and compatibility with assistive technologies. 3. Engage National Partners: a. Collaborate with national organizations and advocacy groups representing vulnerable populations to promote awareness of online consultations and encourage participation. 4. Provide Feedback Mechanism: a. Implement a feedback mechanism on the government portal where participants can provide input 5. Publicize Results: a. After the consultations, publish a summary of the feedback received and actions taken in response.
Case Examples	Check out Germany's online petitions for migrant groups
