

National OSI Custom Test Module

Section: National Digital Government Infrastructure

National Digital Identity Gateway #401

What A single sign-on national digital ID authentication gateway for accessing all government online services.

Why Eliminates multiple logins, secures citizen personal data, and streamlines cross-agency service delivery.

How? Indicative Steps: 1. Check for single citizen login portal. Criteria for Yes: Centralized identity provider (eID/SSO)

Case Examples Estonia e-Residency/Smart-ID, Singapore Singpass, UK GOV.UK One Login.

Check out <https://singpass.gov.sg>

Centralized Public e-Procurement Portal #402

What A national electronic portal publishing all government tender notices, bids, award notices, and contract values.

Why Promotes fair market competition, prevents corruption, and provides transparency in public spending.

How? Indicative Steps: 1. Search national e-procurement portal. Criteria for Yes: Open tender listings and contract awards.

Case Examples South Korea KONEPS, ChileCompra, UK Contracts Finder.

Check out <https://contractsfinder.service.gov.uk>

National Open Government Data Catalog #403

What A centralized national data repository offering public sector datasets in machine-readable open formats (CSV, JSON, etc.).

Why Stimulates economic innovation, academic research, and public accountability through open data access.

How? Indicative Steps: 1. Navigate to open data portal. Criteria for Yes: Searchable dataset catalog with direct download links.

Case Examples Data.gov (USA), Data.gov.uk (UK), Data.gouv.fr (France).
